

COPOD on controlled synthetic data

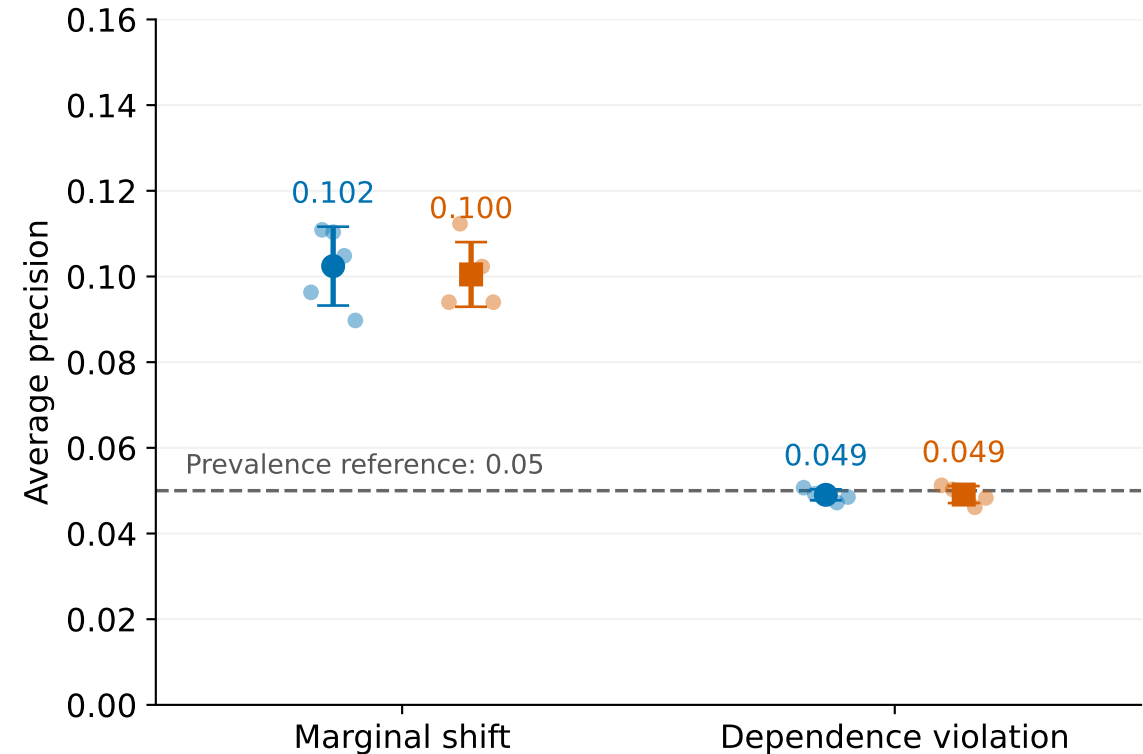

Five data seeds (42–46) | 20 features | 5% anomalies

● Standard PyOD (batch) ■ Modified training reference

ROC AUC (higher is better)

Average precision (higher is better)

Small dots: individual seeds. Large symbols: means. Error bars: ± 1 sample SD (not confidence intervals).

Each run: 6,000 training / 4,000 test rows. AP axis is zoomed to 0–0.16; its full range is 0–1.
